

Baked Enamel

Constructed of galvanized steel, cleaned and finished with electrostatic high-grade synthetic enamel, and oven baked to provide a mar-resistant finish. Patented Permaseal™ edge design features a water tight fit, which provides superior panel integrity against moisture penetration to stop panels rusting from the inside.

MATERIAL

Mills® state-of-the-art paint system offers 21 rich colors with long-lasting finishes. Colors are pre-tested, oven temperatures are controlled exactly, and conveyor speed is monitored. This electrostatically applied baked enamel finish combined with the exclusive Permaseal edge design makes Mills the best metal partition system available.

A Mills 15-year "rust-out" warranty applies.

PRODUCTS

Sentinel™ overhead braced partitions, floor braced partitions, ceiling hung partitions, floor to ceiling partitions, urinal and sight screens.

APPLICATIONS INCLUDE

Mills baked enamel partitions are the durable, economical choice for office buildings, restaurants, religious facilities or any application with moderate traffic.

For immediate delivery from stock colors, contact your local Mills distributor.
